Professional Summary

Highly motivated full-stack developer with a proven track record of building robust and scalable web and mobile applications. Expertise in React Native, AWS cloud, Google Firebase, and Google Flutter for crafting user-friendly cross-platform experiences. Strong understanding of networking concepts, including REST APIs and websockets. Committed to delivering high-quality solutions while adhering to best practices and agile methodologies.

Work Experience

Intern

jun 2022 - may 2024

Please provide me with the text you want me to make ATS-friendly. I need the actual content to work with, so I can make it professional, ATS-compliant, and at least 50 words long. I can help you highlight your skills, achievements, and experience in a way that will get noticed by Applicant Tracking Systems.

Projects

Expense Tracker

[Link to Demo](#)

This application empowers users to effectively manage their finances. It allows for setting and limiting budgets, ensuring financial discipline. Furthermore, it meticulously tracks recent transactions, providing a clear and comprehensive overview of spending patterns. The application then visualizes this data through interactive graphs, offering insightful and actionable insights into financial behavior. This intuitive approach promotes informed decision-making and fosters a healthier relationship with personal finances.
